- The ANPR Engine SDK is a set of software development tools that allows application developers to integrate our

Q: Power series formalizing a function $f(x)$ I am trying to formalize a function f of one variable. Defining $f : \mathbb{R} \rightarrow \mathbb{R}$ by $f(x) = \frac{1}{1-x}$ I want to ask if f is a power series. f is a power series with radius of convergence $=1$. That is, I want to check if there is a (finite) series $\sum_{k=0}^{\infty} c_k x^k$ such that: $f(x) = \sum_{k=0}^{\infty} c_k x^k$ I tried using the Lagrange Inequality to show that $|c_k| \leq \frac{1}{k+1}$ for $k \geq 1$ and therefore, $\sum_{k=0}^{\infty} c_k x^k \leq \sum_{k=0}^{\infty} \frac{x^k}{k+1} = \sum_{k=0}^{\infty} \frac{x^k}{k!}$

and, since the series on the right is convergent for $0 \leq x < 1$, then the series on the left converges for $0 \leq x < 1$ and diverges for $x > 1$. I am having trouble showing that $c_0 = \frac{1}{2}$. I would like a more formal approach to show that $c_0 = \frac{1}{2}$ and the radius of convergence is 1 if that is what is needed. A: Rewrite the definition of f as $f(x) = \frac{1}{1-x} = 1 + x + x^2 + x^3 + \dots$ We know that the partial sums of this series converge to f on every compact subset of $[0, 1)$
